<snipped out two small articles in the same column>

The news of the death of Dr. Andrews of Monroe, reached this city last evening. He died at Fort Wayne at which place he went a few weeks ago to take treatment. For a year past he has been suffering from cancer of the liver, which caused his death. The Dr. was about thirty-five years old and an exceptionally bright and studious young man, with many warm friends and personal admirers. We go to press too early to state the day or place of burial.
