

LOCAL HATCHERY BUYS TWO NEW INCUBATORS

Monday Feb 12, 1934

Will start building Operations as soon as Weather Permits

Will use Frame Structure Now

[REDACTED] Petersime, president of the Petersime Incubator Company, of Greensburg, O., was in Berne Saturday at which time negotiations were concluded by which the Berne Hi-Way Hatchery will receive immediately two new electric incubators of the latest type. Shipment will be made at once.

Vilas Schindler and Ervin Schindler, officials of the corporation whose main building was destroyed by fire a week ago, announced last Friday that they will rebuild. They stated this morning that every year since they are operating their business increased over the preceding year's business,. As soon as weather becomes favorable, building will be commenced.

In the meantime they will move the Kuntz heirs' house located on West Center street, directly north of the Sm Wittwer home, on the Berne Hi-Way property site along Federal Road No. 27. The house will be moved on the north side of the razed hatchery and following the completion of the new building this spring will be used as a garage.

The owners are planning to move the house this week if the weather is at all favorable and the incubators will be installed immediately so that they will be able to cater to the trade. The proprietors state that they have already received many orders and that their intention is to have as little delay in the delivery of chicks as possible.

They chose to install two incubators of the latest Petersime make because past experience convinced them that chicks hatched in Petersime have the greatest liveability.

The Petersime factory is a flourishing concern. They have machines in all parts of the world. Each Wednesday and Saturday at 11:15 A. Am the Petersime company broadcasts over WOWO.
