

GEORGE MILLER - small pox

Source: Waveland Independent Waveland, Montgomery County, Indiana Feb 5, 1904

Small Pox -- After having this pestiferous disease all around us for 3 years now we have our first case within town limits. George Miller came home from Brazil Thursday saying he had a heavy cold. On Sunday he broke out with a typical case of small pox. In the meantime quite a number of persons had been exposed after the disease developed. These are being watched and will be put under quarantine tomorrow. A considerable number of persons have been recently vaccinated the physicians think that there will be no trouble in controlling the disease. Indeed, there may possibly be no other cases. kbz
