

## JOHN LAWTON - fire in barn - seriously burned

**Source:** Crawfordsville Daily Journal Nov 25, 1914

Darlington, Nov 25 - John Lawton of near Garfield, who was badly burned Tuesday afternoon when his barn caught fire, is thought from a spark from an engine which propelled a shredder, is no better and his physicians pronounce him in a very serious condition. It is thought that Lawton inhaled the flames from the fire besides being badly burned and that his case may develop into one of double pneumonia. If this turn should come about, it might result fatally. It took rescuers and physicians a full hour to bring the man back to consciousness when he was burned Tuesday.
